Project Name:

Type:

Standard Light Distribution  
Direct: 37.5% Indirect: 62.5%

## CASAMBI

### APPLICATION

Architectural indoor, direct/indirect suspended light for LED system. Reflection from the ceiling creates soft and diffused lighting that ensures maximum visual comfort and balanced shadows. Frosted lens on direct light helps to distribute smooth and equal distribution. It can be installed individually or in a continuous line. Use for general office, bank, retail and educational environments.

### FEATURES:

- Die formed 20 gauge cold-rolled steel housing. Flat steel end plate standard. Powder coated for a long life finish. White finish is standard. Die cast aluminum spade end cap optional.
- 2', 3', 4' and 8' individual fixture sections for nominal suspension spacing of 2', 3', 4' and 8'. Using 2', 3', 4' and 8' sections can be joined to form longer length fixtures.
- Frosted lens.
- Up light and down light distribution.
- Textured matte white polyester powder paint.

### MOUNTING:

- Provided with a standard 48" length aircraft cable mount kit for suspended mounting.

## NOTES:

- No need to select, if same as row length and section length.
- EM is installed in last 4' of luminaire sections. Separate section required 2SE or specified.  
Must specify voltage, not available with 347V. Contact factory for other emergency ballast options.
- Contact factory for custom wattage or lumen requirement.
- Lumens and watts per foot may differ for STEP drivers, consult factory.
- This limited warranty covers electrical parts only and does not apply to labor, equipment lease, or defect from improper installation or operation.
- Dimming wires provided and connected to sensor only, not for dimmer switch.  
(available with AMS and DPMS option)
- For separate dimming control, please be advised it may not be available when EM battery backup is added due to limited space. Please contact us for more information.
- Shipped separately.
- "RS-WS" option can be added if wish to have a wall switch,  
please see Enlighted Room Controller in the separate attachment.

- Available with C9 only.
- Lumen per watt is around 15% less than standard CRI (80+).
- See NFC and IR manual in the separate attachment.  
If your phone is not compatible, please order "RS-IR" and follow the manual.
- Refer to Advanced Grouping Datasheet for its default setting and compatible wireless switches.
- Can have up to 2 power feeds depending on the configuration.
- 347V cannot work with Emergency Battery Backup.
- Must be ordered either with 0-10V LED driver or TRIOT (IoT-Ready LED driver).
- Automatic on/off is not available. For automatic on/off, additional occupancy sensor is required or a manual on/off switch can be done.
- With TDM/ELV/SDxx/TDxx: Only available with line-voltage on/off occupancy sensor.

## NOTES:

1. All devices connected to one FCJ/FCJS-ECO will be controlled together. Devices will dim to the same level as the result of a control command. For more detail on adjusting low-end light level refer to Application Note#556 at [www.lutron.com](http://www.lutron.com).
2. For the Line/Hot (L/H) terminal on the driver, it is preferred not to use the switched hot (red) wire from the control but rather the hot wire directly from the power source.
3. Recommended for EasySense System.
