### NOTES:

1. All devices connected to one FCJ/FCJS-ECO will be controlled together. Devices will dim to the same level as the result of a control command.

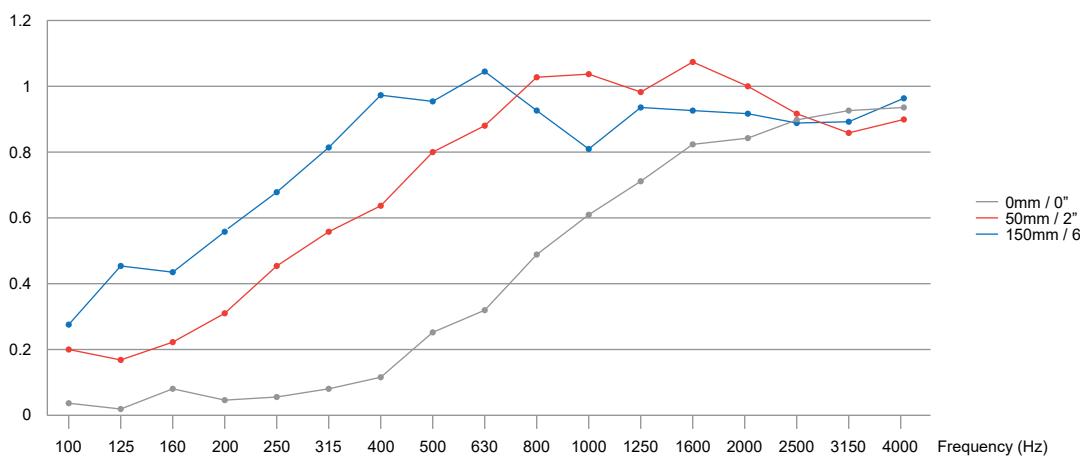

For more detail on adjusting low-end light level refer to Application Note#556 at [www.lutron.com](http://www.lutron.com).

2. For the Line/Hot (L/H) terminal on the driver, it is preferred not to use the switched hot (red) wire from the control but rather the hot wire directly from the power source.

3. Recommended for EasySense System.
